Powder Technology 94 (1997) 273–275

POWDER TECHNOLOGY

Subject Index of Volume 94

Ablation
pipeline transport of large ablating particles in a non-Newtonian carrier, 223
Acoustic field
fluidization of group B particles in an acoustic field, 23
Acoustic technique
experimental acoustic technique in granular flows, 85
Agglomeration
critical parameters and limiting conditions in binder granulation of fine powders, 245
Amorphous particles
synthesis of nanoscaled iron particles from freeze-dried precursors, 29
Attrition
computer simulation of shear-induced particle attrition, 109
stress analysis of brittle spheres under multiaxial loading, 153

Binders
critical parameters and limiting conditions in binder granulation of fine powders, 245
Breakage
computer simulation of shear-induced particle attrition, 109
a new estimation technique for the determination of breakage and selection parameters in batch grinding, 173
Brittle spheres
stress analysis of brittle spheres under multiaxial loading, 153
Bulk solids
pressure drop and slug velocity in low-velocity pneumatic conveying of bulk solids, 123

Candle filters
analysis of operational filtration data, 15
Capsule pipelines
drag coefficient of a capsule inside a vertical angular pipe, 239
Chrysotile fibres
deposition of titanium dioxide on Brazilian chrysotile fibres, 73
Circulating beds
radial gas mixing in a fast fluidized bed, 163
Coagulation
deposition of titanium dioxide on Brazilian chrysotile fibres, 73
Coal/waste coprocessing
rheology of coal/waste coprocessing mixtures, 207
Coal logs
coal log pipeline technology: an overview, 217
Coating process
establishing temperature and humidity profiles in fluidized bed particulate coating, 181
Collision model
simulation of solid–liquid flows in a vertical pipe by a collision model, 201
Collisions
experimental acoustic technique in granular flows, 85

Elsevier Science S.A.

Compaction
reversibility and irreversibility in the packing of vibrated granular material, 79
coal log pipeline technology: an overview, 217
Composites
intermetallic Fe–Al layers obtained by the powder cloth method, 259
Compressible dispersed phase method
computer simulation and experiments on two-phase flow in an inclined sedimentation vessel, 35
Computational fluid dynamics
computer simulation and experiments on two-phase flow in an inclined sedimentation vessel, 35
Contact mechanics
stress analysis of brittle spheres under multiaxial loading, 153
Conveying
coal log pipeline technology: an overview, 217
Core flow
lubricated pipelining, 211

Densification
reversibility and irreversibility in the packing of vibrated granular material, 79
Deposition
deposition of titanium dioxide on Brazilian chrysotile fibres, 73
Descending particles
simulation of descending particles in water by the distinct element method, 195
Desulfurization
preparation and characterization of fly ash/hydrated lime sorbents for SO_2 removal, 133
Diffusion layer
intermetallic Fe–Al layers obtained by the powder cloth method, 259
Discrete element method
microstructural simulation and imaging of granular flows in two- and three-dimensional hoppers, 59
Distinct element method
simulation of descending particles in water by the distinct element method, 195

Failure
stress analysis of brittle spheres under multiaxial loading, 153
Fe–Al intermetallic phases
intermetallic Fe–Al layers obtained by the powder cloth method, 259
Filtration
analysis of operational filtration data, 15
Fines
shear flocculation of fine hematite particles and correlation between flocculation, flotation and contact angle, 1
Flocculation
shear flocculation of fine hematite particles and correlation between flocculation, flotation and contact angle, 1

Flotation
shear flocculation of fine hematite particles and correlation between flocculation, flotation and contact angle, 1
Flow
hydrodynamic modeling of vertical accelerating gas–solids flow, 91
lubricated pipelining, 211
Fluidization
fluidization of group B particles in an acoustic field, 23
Fluidized beds
radial gas mixing in a fast fluidized bed, 163
establishing temperature and humidity profiles in fluidized bed particulate coating, 181
Fly ash/hydrated lime
preparation and characterization of fly ash/hydrated lime sorbents for SO_2 removal, 133
Fragmentation
computer simulation of shear-induced particle attrition, 109
Freeze-drying
synthesis of nanoscaled iron particles from freeze-dried precursors, 29

Gas adsorption
the role of interparticle forces in the fluidization of fine particles, 99
Gas cleaning
analysis of operational filtration data, 15
Gas distributors
performance of a tuyère gas distributor, 5
Gas flow
radial gas mixing in a fast fluidized bed, 163
Granular flow
microstructural simulation and imaging of granular flows in two- and three-dimensional hoppers, 59
experimental acoustic technique in granular flows, 85
Granular kinetic theory
computer simulation and experiments on two-phase flow in an inclined sedimentation vessel, 35
Granular media
reversibility and irreversibility in the packing of vibrated granular material, 79
Granulation
establishing temperature and humidity profiles in fluidized bed particulate coating, 181
critical parameters and limiting conditions in binder granulation of fine powders, 245
Grinding
a new estimation technique for the determination of breakage and selection parameters in batch grinding, 173

Haematite
shear flocculation of fine hematite particles and correlation between flocculation, flotation and contact angle, 1
synthesis of nanoscaled iron particles from freeze-dried precursors, 29
Hoppers
microstructural simulation and imaging of granular flows in two- and three-dimensional hoppers, 59
Humidity profiles
establishing temperature and humidity profiles in fluidized bed particulate coating, 181
Hydraulic conveying
pipeline transport of large ablating particles in a non-Newtonian carrier, 223
Hydrodynamics
hydrodynamic modeling of vertical accelerating gas–solids flow, 91

Imaging
microstructural simulation and imaging of granular flows in two- and three-dimensional hoppers, 59
Integrated gasification combined cycle technology
analysis of operational filtration data, 15
Iron
synthesis of nanoscaled iron particles from freeze-dried precursors, 29

Levenberg–Marquardt algorithm
a new estimation technique for the determination of breakage and selection parameters in batch grinding, 173
Liquefaction
rheology of coal/waste coprocessing mixtures, 207
Lubricated pipelines, lubricated pipelining, 211

Micromechanical analysis
critical parameters and limiting conditions in binder granulation of fine powders, 245
Mixing
radial gas mixing in a fast fluidized bed, 163
Modelling
hydrodynamic modeling of vertical accelerating gas–solids flow, 91

Nanoparticles
synthesis of nanoscaled iron particles from freeze-dried precursors, 29
Numerical simulation
pneumatic slug conveying in a horizontal pipeline, 229

Oil–water flow
lubricated pipelining, 211

Packing
reversibility and irreversibility in the packing of vibrated granular material, 79
Particle cloud density
measurement of transport properties of a gas–solid suspension using phase Doppler anemometry, 141
Particle deformation
the role of interparticle forces in the fluidization of fine particles, 99
Particle diffusivity
measurement of transport properties of a gas–solid suspension using phase Doppler anemometry, 141
Particle transport
measurement of transport properties of a gas–solid suspension using phase Doppler anemometry, 141
cost-effective pumping of coarse mineral products using fine sands, 191
coarse-particle pipeline transport: effect of particle degradation on friction, 235
Phase Doppler anemometry
measurement of transport properties of a gas–solid suspension using phase Doppler anemometry, 141
Photoreactions
deposition of titanium dioxide on Brazilian chrysotile fibres, 73
Pipelines
pressure drop and slug velocity in low-velocity pneumatic conveying of bulk solids, 123
cost-effective pumping of coarse mineral products using fine sands, 191
simulation of descending particles in water by the distinct element method, 195
simulation of solid–liquid flows in a vertical pipe by a collision model, 201
coal log pipeline technology: an overview, 217

pipeline transport of large ablating particles in a non-Newtonian carrier, 223
pneumatic slug conveying in a horizontal pipeline, 229
coarse-particle pipeline transport: effect of particle degradation on friction, 235
drag coefficient of a capsule inside a vertical angular pipe, 239
Plastics
rheology of coal/waste coprocessing mixtures, 207
Pneumatic conveying
pressure drop and slug velocity in low-velocity pneumatic conveying of bulk solids, 123
pneumatic slug conveying in a horizontal pipeline, 229
Pollutant control
preparation and characterization of fly ash/hydrated lime sorbents for SO_2 removal, 133
Powder cloth method
intermetallic Fe–Al layers obtained by the powder cloth method, 259
Pressing
intermetallic Fe–Al layers obtained by the powder cloth method, 259
Pressure drop
pressure drop and slug velocity in low-velocity pneumatic conveying of bulk solids, 123
Pressure gradient
coarse-particle pipeline transport: effect of particle degradation on friction, 235
Probes
measurement of local particle velocities and velocity distributions in gas–solid flows by means of the spatial filter method, 51
Pumping
cost-effective pumping of coarse mineral products using fine sands, 191

Rheology
rheology of coal/waste coprocessing mixtures, 207
Rubber
rheology of coal/waste coprocessing mixtures, 207

Sedimentation
computer simulation and experiments on two-phase flow in an inclined sedimentation vessel, 35
Selection
a new estimation technique for the determination of breakage and selection parameters in batch grinding, 173
Sequential differentiation
a new estimation technique for the determination of breakage and selection parameters in batch grinding, 173
Simulation
microstructural simulation and imaging of granular flows in two- and three-dimensional hoppers, 59
simulation of descending particles in water by the distinct element method, 195
simulation of solid–liquid flows in a vertical pipe by a collision model, 201
Sintering
intermetallic Fe–Al layers obtained by the powder cloth method, 259
Sliding-bed model
coarse-particle pipeline transport: effect of particle degradation on friction, 235
Slug flow
pressure drop and slug velocity in low-velocity pneumatic conveying of bulk solids, 123
pneumatic slug conveying in a horizontal pipeline, 229
Slurries
cost-effective pumping of coarse mineral products using fine sands, 191
pipeline transport of large ablating particles in a non-Newtonian carrier, 223
coarse-particle pipeline transport: effect of particle degradation on friction, 235
Solids transport
coal log pipeline technology: an overview, 217
pipeline transport of large ablating particles in a non-Newtonian carrier, 223
Sound waves
fluidization of group B particles in an acoustic field, 23
experimental acoustic technique in granular flows, 85
Spatial filters
measurement of local particle velocities and velocity distributions in gas–solid flows by means of the spatial filter method, 51
Stress analysis
stress analysis of brittle spheres under multiaxial loading, 153
Surface roughness
the role of interparticle forces in the fluidization of fine particles, 99
Suspensions
measurement of transport properties of a gas–solid suspension using phase Doppler anemometry, 141

Temperature profiles
establishing temperature and humidity profiles in fluidized bed particulate coating, 181
Titanium dioxide
deposition of titanium dioxide on Brazilian chrysotile fibres, 73
Two-fluid model
computer simulation and experiments on two-phase flow in an inclined sedimentation vessel, 35
Two-phase flow
measurement of local particle velocities and velocity distributions in gas–solid flows by means of the spatial filter method, 51
hydrodynamic modeling of vertical accelerating gas–solids flow, 91
simulation of descending particles in water by the distinct element method, 195
simulation of solid–liquid flows in a vertical pipe by a collision model, 201

Ultrafine particles
synthesis of nanoscaled iron particles from freeze-dried precursors, 29

van der Waals forces
the role of interparticle forces in the fluidization of fine particles, 99
Velocimetry
measurement of local particle velocities and velocity distributions in gas–solid flows by means of the spatial filter method, 51
Vibrated beds
fluidization of group B particles in an acoustic field, 23
Vibration
reversibility and irreversibility in the packing of vibrated granular material, 79
